

# OUR REVOLUTION

## ORGANIZE TO WIN

### 2020 PLAN

- ✓ Win on our issues!
- ✓ Transform the Democratic party!
- ✓ Elect progressives up and down the ballot!

## JOIN OUR MOVEMENT!

We are organizing a political revolution to challenge the power of the plutocrats and prioritize the needs of people and our planet. With your support, we are building a national grassroots movement of local groups powerful enough to win progressive issue fights, elect progressive champions, transform the Democratic party, and get big money out of politics. Join us – because when we organize, we win!

Healthcare is a right not a privilege. Yet millions of Americans don't have access to quality, affordable medical treatment even though we spend twice as much per capita on healthcare than every other country.

Medicare for All is the solution. Despite what Big Insurance will tell you, we can afford it. In fact, Medicare for All would save us money by cutting excessive administrative and pharmaceutical costs.

That's why we are organizing to make sure every single Democrat in Congress supports Medicare for All legislation introduced by Bernie in the Senate and U.S. Rep. Pramila Jayapal in the House.

Our climate is in crisis. We have less than 11 years to dramatically reduce our carbon emissions before climate damage becomes irreversible. Starting today, we need to do everything we can to begin to transition our nation to 100 percent clean energy.

That's why we're organizing to win a Green New Deal.

We're fighting to keep fossil fuels in the ground by stopping politicians from issuing new permits for pipelines and we're calling for the creation of a clean energy economy powered by solar, wind and other renewable sources.

## GOOD JOBS FOR ALL

The gap between rich and poor is now the widest it's been in 50 years. As wages continue to stagnate, working people across America are suffering.

Unions are the best antidote we have to income inequality. When workers join unions and use their collective strength to negotiate better wages – all workers benefit. Yet union membership today is at its lowest level in history, with a more than 7 percent decline since Trump took office.

That's why we're organizing to expand the right of workers to form unions, pass a \$15 federal minimum wage, and end so called "right-to-work" legislation. We're also fighting to ensure that our taxpayer dollars are invested in companies that create good union jobs in the USA – not firms that steal wages and ship jobs overseas.

The U.S. has been at war for the past 18 years with no clear objective or endpoint. More than 250,000 civilians have been killed, 7,000 US troops have died, and American taxpayers have paid more than \$2.8 trillion dollars to the military-industrial complex.

Despite the staggering human and economic costs, politicians – both Republicans and Democrats alike – continue spending on warfare instead of healthcare, childcare and other priorities.

That's why we are organizing to dismantle the military industrial complex and end our endless wars – once and for all.

Under President Trump, America's immigration system has become cruel and inhumane. His administration has deported 800,000 people. And, at any given time, there are more than 50,000 people detained at ICE facilities—the highest number in our history.

We are organizing to win comprehensive immigration justice, which includes a moratorium on deportations, a humane policy for asylum seekers, shutting-down detention centers and reuniting families.

By joining together, we can reject the hate and divisiveness and ensure that our nation is a beacon of liberty for all.

The United States incarcerates more people than any other country on Earth at a cost of \$80 billion a year, which translates to big profits for the prison industrial complex.

Many of those who end up behind bars have not been convicted of a crime – they are only in jail because they can't afford to post bail. And because of the historical legacy of racism in this country, the system disproportionately hurts African Americans, Latinos, and Native Americans.

We are fighting to stop this system of injustice and end the practice of corporations profiting off the suffering of incarcerated people and their families.

Free public college used to be a gateway to the American Dream. Now, these formerly free institutions are charging exorbitant tuition and pushing college out of reach for all but America's wealthiest.

Today, more than 46 million Americans are burdened with student debt totaling more than \$1.6 trillion.

That's why we're standing with Bernie and U.S. Rep. Ilhan Omar to call for the cancellation of all student debt. The average borrower would save around \$3,000 a year in student loan payments. This would be a huge economic boost, helping grow our economy by up to \$108 billion per year and creating more than 1 million jobs.
