By Rhoda Wilson

September 13, 2024

Last week, *The GMO Case* released a documentary titled '*The Truth: About Covid-19 Shots*'.

Produced by Gaz and narrated by Maryanne Demasi PhD, former presenter with the ABC science show *Catalyst*, the documentary reveals facts which have been concealed from the Australian public about the covid injections.

It shows how authorities abused their powers and robbed Australians of their civil liberties in what some have described as a crime against humanity. The Pfizer and Moderna injections are gene therapies that carry grave risks.

Millions of Australians have been unwittingly subjected to gene-based injections and Australian regulators have been complicit in failing to carry out their most basic duty of protecting the public.

*The GMO Case: The Truth: About Covid-19 Shots*, 7 September 2024 (23 mins)

*The GMO Case* is a new website to simply provide "The Truth" to a global audience, Australian lawyer and former barrister Julian Gillespie explained. In the same article, he gave an update on the status of "The GMO Case" which is seeking the withdrawal of covid injections in Australia on the basis that the Pfizer and Moderna mRNA injections are regarded at law as genetically modified organisms ("GMOs") in most major jurisdictions

## The Truth: About Covid-19 Shots

*The following is a description of the documentary originally published by the documentary's producer, Gaz. Gaz's – The Defender's Voice is an army veteran and independent micro-publisher who is passionate about defending freedom.*

'*The Truth: About Covid-19 Shots*' delves into the alleged concealment of critical information regarding the safety and efficacy of covid-19 mRNA injections, focusing on how regulatory bodies and authorities misled the Australian public. It claims that significant contamination of genetic material was found in Pfizer and Moderna vaccines, far exceeding safety thresholds, with potential links to severe health risks like cancer and

autoimmune diseases. Despite independent verification from multiple labs, global regulators, including Australia's Therapeutic Goods Administration ("TGA"), dismissed concerns, claiming there was no safety risk without conducting proper tests.

The video argues that the mRNA injections are in fact gene therapies rather than traditional vaccines, citing how these injections modify genetic material within cells to stimulate an immune response. It criticises the lack of rigorous testing on the long-term effects of this genetic modification, accusing manufacturers and health authorities of withholding important information about the risks, such as the bio-distribution of modified RNA throughout the body and its potential to disrupt cellular functions.

Legal challenges against Pfizer and Moderna are outlined, notably the case of Dr. Julian Fidge, who accused the companies of bypassing Australia's regulatory requirements for gene therapies. The lawsuit was dismissed due to a lack of legal standing, but the video highlights potential conflicts of interest, including Judge Helen Rofe's undisclosed connections to Pfizer. This raises questions about the integrity of the judicial process, especially regarding the dismissal of critical evidence related to genetic contamination.

The video also condemns the narrative pushed by health authorities that the vaccines were "*safe and effective*," arguing that data showed minimal absolute risk reduction and high infection rates among vaccinated individuals. It accuses authorities of fearmongering, particularly regarding children, and asserts that pregnant and breastfeeding women were given false assurances about the safety of the vaccines, despite being excluded from clinical trials.

Ultimately, the video calls for accountability and justice, emphasising that millions of Australians were subjected to experimental gene-based treatments without adequate informed consent. It demands transparency, thorough investigations into regulatory failures, and reparations for those harmed. The script ends with a strong appeal to hold responsible parties accountable and to ensure that such breaches of public trust are never repeated.

### **Breaking News: Investigation begins into Federal Court Judge accused of hiding Pfizer ties, Maryanne Demasi, 4 September 2024**
