LEGISLATOR OF THE WEEK!

Saturday, Jan. 25

Good morning! Hope you are enjoying the weekend!

Week 2 of the legislative session wrapped up on Thursday. And while the first week was pretty vanilla, things picked up a bit during the second. It is fair to be cautiously optimistic that some truly good things may come from this year after all.

Much of the week, though, was consumed by what was happening at the national level. If you haven't heard, President Donald J. Trump returned to the White House this week. And he returned ready to get to work.

President Trump issued a number of significant executive orders and issued some pretty important pardons.

Just as he promised throughout the campaign, it appears the administration is serious about addressing the illegal immigration issue.

And it should.

Illegal immigration is a drain on our society. Illegal immigration takes resources away from Americans who need them, and gives them to people who have no right to even be in our country.

Money spent on educating children of illegal immigrants? That is money not spent on children of American citizens. Money spent on treating illegal immigrants in the ER? That is money not spent on American citizens.

That list could go on.

And that isn't even the most costly consequence of illegal immigration. No, the most costly consequence of illegal immigration is dead Americans. Americans like Sarah Root, Laken Riley, Mollie Tibbetts or any of the other Americans who have been killed due to illegal immigration.

That is another list that, unfortunately, could go on and on.

America just suffered through a four-year invasion encouraged if not orchestrated by the previous president. Our country is far more vulnerable today than it was four years ago because of the millions and millions of illegal immigrants it let into America. And then in some cases flew across America.

But this week marked a new beginning. A return to America First policies, and an America First border. And most Americans are thankful.

But not the people who seem to be in charge of government education. I've seen communications from some of Iowa's largest school districts this week that are stoking fear because the federal government may actually start enforcing and applying immigration laws.

The horror these superintendents feel at the idea a country may start putting its people first and caring more about its citizens than catering to law-breakers.

It's amazing how it is always something with these professional indoctrinators. When is the last time professional indoctrinators came down on the conservative side of a political issue?

Yet these are the same people many Americans entrust their children with on a daily basis. Now, there are some teachers — maybe even most teachers — who are not crazy, kooky Leftist regressives.

But the problem is the system. The system fights conservatism, it fights sanity every step of the way.

Here is reality — the government education system is broken beyond repair. We can throw money at it and try to legislate sanity back into it, but it's gone. It isn't coming back, either. At times we may be able to minimize

the damage, but it will continue causing damage.

We're fooling ourselves if we think anything different.

The problem? We now have Marxists who were educated by Marxists educating children. Think of all the problems we see or hear about in classrooms today and ask yourself what it'll be like in 30 more years when today's students are doing the teaching.

These kids are being inundated every day with Marxist, leftist, regressive political ideology.

Yet as consumers, we keep using their product that we are forced to pay for as taxpayers.

The issue of illegal immigrants being deported should have nothing to do with schools and education. But the leaders of the system are making it an issue.

Why? Because the system is broken beyond repair.

If we could fix one issue that would have the largest trickle down effect on all the other political issues — it would be education. School is where we are educating future voters, future politicians, future CEOs, future...well... the future, period.

And we're trusting the future to radical, nutty, Marxist, leftist regressives who put political ideology ahead of everything.

We can wait and see how that'll turn out in another 20, 30, 40 years. Or we can wake up to the reality of what that will look like now and start having honest discussions about it today.

Things need to radically change as it relates to education. I happen to believe it's too late to salvage the current system.

We need to really get serious about this or we're going to suffer extremely serious consequences in the next generation.
