

One quarter of all pregnancies in Australia are terminated, and around one quarter to one third of Australian women will experience an abortion in their lifetime.

The number of surgical abortions for all women was 67,546 in 2017–18, while the number of prescriptions of combination mifepristone/misoprostol for medical abortion was 20,741.

**The total number of abortions therefore for all women during 2017–18 was therefore 88,287.**

That equates to **ONE AVERAGE PRIMARY SCHOOL** being terminated **EVERY SCHOOL DAY.**

***One average primary school is terminated every school day***

Surgical abortion is legal and available in all states and territories **UP UNTIL BIRTH** with two doctors' approval. The two doctors can be the local doctor and the abortionist.

Chemical abortion is legal up to 9 weeks gestation in every state and territory with **ONE** doctor's approval.

A woman's sexual partner is not required to be notified of an abortion. No waiting periods are imposed on having an abortion. **A minor does not need to notify a parent** of a proposed abortion, nor is parental consent required.

The "Morning after pill" also kills babies. There are two types. One can be used up to 72 hours (3 days) after conception, the other type is a newer option that can be used up to 120 hours (5 days) afterwards. Both are available in Australia from pharmacies **without a prescription**.

Every baby is created by God, and from conception has a right to life.

**365Life spreads the message of life** (604,000 cards since 2019) across Australia, while also connecting troubled women with 56 pro-life crisis pregnancy centres.

What we are doing brings enormous hope to our confused and suffering world. Every card can save a life.

***365Life cards have an immediate and long-term effect***

With great love for our Saviour, Jesus,

Grace and peace,

Peter & Diane Stevens
