MUTH'S TRUTHS

Is Cisco Aguilar the Worst Secretary of State in America?

Let me tell you about "Jane Doe."

That's not, of course, her real name. But at this point there's no reason to identify her. It's her story that's important.

In early 2024, we – the Pigpen Project – began submitting to various Nevada counties information we'd obtained from the United States Postal Service (USPS) indicating that voters then on the "Active" registration list had moved from where they were registered.

We requested that they begin the process of deactivating them.

But in March 2024, Nevada Secretary of State (SOS) Cisco Aguilar issued a memo instructing the various county clerks and registrars NOT to process our submissions.

He advised that we should formally "challenge" the voters instead. Which is exactly what we then began to do.

In the summer of 2024, we submitted around 30,000 challenges to voters who had filed a change-of-address with the post office but remained on the “Active” voter registration file.
