

# Australian doctor Professor Richard Scolyer confirms the Moderna mRNA Cancer Vaccine does NOT WORK!!

William Makis

March 28, 2026

**Professor Richard Scolyer AO** @ProfRAScolyer · Mar 17

Not the best day ever..... Today I had another scan of my brain followed by further discussions with the neuro-oncology team who continue their wonderful care. There seems to be further progression of my brain tumour (glioblastoma) affecting brain functioning (as me and a few close friends can feel/see). Whilst it is a bit disappointing, in the big picture it's not the end of the road and I've got more to do! I love and enjoy challenges. I certainly haven't stopped yet. Hopefully I can share more special times with family and friends, and continue to advocate for cancer patients.

Famous Australian Dr. Richard Scolyer developed an aggressive brain tumor, Glioblastoma **after taking multiple COVID-19 mRNA Vaccines** due to Australia's draconian mandates, to keep his job. After he was **diagnosed with Glioblastoma**, he did not pursue the top repurposed drugs for Glioblastoma: **Mebendazole and Ivermectin** (Johns Hopkins has a patent on Mebendazole for treating Glioblastoma). Instead, **he volunteered to test Moderna's new mRNA Cancer Vaccine mRNA-4359**, which doesn't work, although they are still pushing forward with Phase III trials by mixing it with Keytruda. **(see my past substack articles) Richard Scolyer has just admitted online that his Glioblastoma is progressing,**

despite taking multiple injections of Moderna's mRNA-4359 Cancer Vaccine for the past year. I predicted this EXACT outcome on my substack last year. It's very sad, that he won't try Mebendazole which is patented for his disease, or Ivermectin.

Unfortunately, he put his faith in the same corrupt medical system that brought us the cancer causing Pfizer and Moderna COVID-19 mRNA Vaccines. Professor Richard Scolyer, if you're reading this, you were the victim of two frauds: **1. COVID-19 mRNA Vaccines cause Cancer and Glioblastoma is the 2nd most common Turbo Cancer** **2. Moderna's mRNA Cancer Vaccine mRNA-4359 doesn't work and is a FRAUD.** May God guide the rest of your journey.
