"Broken Arrow"

by John D. Guandolo

The Battle of Ia Drang Valley--fought November 14-18, 1965--was the first major engagement of the Vietnam War between U.S. forces and North Vietnamese regular army troops. Lieutenant Colonel Hal Moore, commander of the 1st Battalion, 7th Cavalry Regiment, found his unit up against three regiments of North Vietnamese forces. After two days of fighting, being overrun on all sides, LtCol Moore radioed in "Broken Arrow" which brought all available air power and indirect fire onto the enemy in close proximity to Moore and his men.

Today in America, as I review the reality of where we are in this war, "Broken Arrow" is the only phrase that fits.

Situation

2016 "Russia Collusion"

Evidence clearly demonstrates senior US leaders including Presidents Obama and Biden, John Brennan, Hillary Clinton, and many others worked with Ukrainian intelligence and security officials to hinder President Trump's 2016 Presidential campaign while aiding Mrs

Clinton in violation of numerous federal laws, the most significant of which is treason.

Evidence also reveals FBI Director James Comey, Deputy Director Andrew McCabe, senior FBI officials, and others in and out of the government conspired to produce an application for the FISA Court they knew was filled with lies in order to unlawfully surveil candidate and then President Donald Trump, his family and his staff.

2020 Coup

Many of these same perpetrators conspired to seize power by conducting a coup against the US government, the will of the American people, and the Constitutional process in the 2020 election. The US government has finally acknowledged "treason" by President Obama and others, and revolutionary actions taken by senior government officials.

Yet, as of today, only James Comey has been charged and those charges do not reflect his participation in a war against the United States of which he is acting on behalf of hostile foreign actors.

The Islamic and Communist Movements

The Islamic and communist Movements have published doctrine and strategy, massive networks in the US, have hundreds of lines of operation, and are supported by many individuals and organizations that do not necessarily share their ideology, but want to see America destroyed nonetheless.

At the local level across America the jihadis and communists operate seamlessly. Their primary tools to undermine America's Constitutional Republic are not forms of violence, but espionage, counterintelligence, subversion of our key pillars of society, economic warfare, propaganda, and psychological operations.

While significant terrorist attacks against the US have been greenlighted by Al Qaeda, the threat of the thousands of suit-wearing jihadis working inside local, state, and federal government agencies gathering intelligence and preparing for war poses a much greater threat and has, for over three decades, been ignored by military and civilian leaders.

Currently, known Muslim Brotherhood organizations continue to work inside the Trump administration while Hamas, Hizbollah, Al Qaeda, and Lashkar e Taiba terrorists are also welcome (e.g. Imam Hussein, Rabiul Chowdhury, Ismail Royer). Jihadis in the government, like CIA analyst Asif Rahman who leaked classified information that helped the Iranians, have access to all US classified systems because being a sharia-adherent muslims does not disqualify a person from getting a Top Secret SCI clearance as it should.

These are not "radical" or "extremist" muslims. These are muslims doing what normative, mainstream Islam teaches. Ask any federal or state leader what the purpose of Islam is and you will get an incoherent response. Nearly 25 years after 9/11 and American leaders are as clueless today about Islam as they were about it when sharia-adherent muslims

killed nearly 3000 Americans. Maybe over three decades of relying on "moderate muslims" has intentionally led the US to the brink of defeat--almost like the Islamic Movement has a plan. While Vice President Vance tells America "We love Pakistan," Pakistani intelligence operatives are having their way with the US government, which appears to be unaware that counterintelligence is actually a thing with which a nation should concern itself.

Yet, there is currently no training at the state or federal level about the massive communist and Islamic Movements in the United States, their networks, doctrine, strategy, or anything else related to it. There is a war being waged by hostile foreign powers Iran, China, Saudi Arabia, Pakistan, Qatar, Turkey, UAE, Egypt, and many others using thousands of US proxies like BLM, Asians for Black Lives, Chinese Progressive Association, Democratic Socialists, NIAC, USCMO, CAIR, ISNA, MSA, Emgage, MAPS, and so many others. We hear lots of tough talk, but not one jihadi or communist leader has been killed or captured in the United States and not one of these organizations has been shut down.

Its not hard to find them. Jihadis and communists are in our elementary schools, colleges, chambers of commerce, interfaith programs, local city councils, state legislatures, US Congress, churches and synagogues, media, and the National Security Council, and they are managing hotels, driving our foreign policy, teaching at our war colleges, and openly hosting conferences to discuss how and when to go kinetic in America at a grand scale.

We are overrun. "Broken Arrow."
