A group of pro-Palestinian protesters descended on Hillel at the University of Oregon on Wednesday — the third anniversary of the Hamas terrorist attacks — to demand the Jewish student group be banished from campus.

Chants from the group of roughly 25 protesters included praise for those who conducted the “Operation Al-Aqsa Flood” incursion that killed more than 1,200 Israeli civilians on Oct. 7, 2023, according to videos of the protest obtained by *The College Fix*.

“Hillel off campus,” the group chanted. “Glory to the martyrs of the Al-Aqsa Flood.”

“No more IDF on campus,” was another chant led by the Anti-Imperialist Front group. It’s unknown how many students took part in the demonstration.

There was no movement visible from inside the Hillel house as the chants continued from the protesters, most of whom donned masks and hoodies to conceal their identities.

Two Israeli flags hung from windows of the two-story house, and candles flickered in each of its window sills to memorialize the victims of the terrorist attack. The house is located at the western edge of the University of Oregon campus in Eugene.

On Wednesday afternoon, protesters also burned an American flag along the sidewalk near the house’s front porch.

Watch on

Materials handed out by the activists stated the reason they’re targeting Hillel is because it is “a Zionist organization which serves as a propaganda hub and recruitment branch on campuses across the United States for the genocidal ‘IDF.’”

Why are we marching on October 7th? The answer is straightforward, and we make no apologies and attach no caveats. We are celebrating the blow that was dealt to the Zionist occupation by the armed forces of the Palestinian National resistance three years ago. The Anti-Imperialist Front USA (AIF), like all people of conscience, hold that a people undergoing decades of occupation, genocide, and enforced starvation are entitled to resist their oppressors by force of arms. Since October 7th of 2023, the balance of power in the Greater Middle East has begun to shift. The US and its mad dog "Israel" are being driven out of the region by the Unity of Fields, those being the anti-imperialist forces of the Palestinian Resistance Factions, Hezbollah, Ansar Allah, the Iraqi Islamic Resistance, and the Islamic Republic of Iran. This current moment of advancement would not be possible were it not for the heroic actions and sacrifices undertaken by the Palestinian people.

We hold that it is fundamentally right to rebel against oppression and exploitation, and are against all reactionary schemes to loot, kill, displace, starve, and enslave the working and oppressed masses around the world.

Why are we marching on Hillel in particular? The answer is again very simple. Hillel is a Zionist organization which serves as a propaganda hub and recruitment branch on campuses across the United States for the genocidal "IDF". They purposely conflate Zionism with Judaism when they call themselves a "Jewish Cultural Organization" but in reality they funnel in youth to carry out settler expansionist violence or die for the gain of ruling class. It does not matter if it is a mosque, a church, a synagogue, a cultural or religious organization of any description – materially supporting Zionism, occupation, and genocide is not something the masses of people are willing to tolerate any longer. Americans are already footing the bill for the Zionist project every time we pay taxes, by billions of dollars. Having an organization in our city that invites active combatants from an army engaged in a genocide to propagandize to the students and the masses, as Hillel has done several times since October 7th of 2023, is not something people are willing to accept.

We demand that the University of Oregon (UO) no longer recognize Hillel, and ban them from campus. We demand that the UO no longer allow military or intelligence firms to recruit on campus or partner with any college. We further demand that the UO, the largest center of finance capital in our city, divest from any financial asset profiting from the exploitation of all oppressed people, especially from the death and suffering of Palestinians. These are not the demands of extremists or fanatics, these are the righteous demands of the people. We refuse to allow relations with the Zionist occupation to continue to be normalized, obfuscated, or swept under the rug.

"They purposely conflate Zionism with Judaism when they call themselves a 'Jewish Cultural Organization' but in reality they funnel in youth to carry out settler expansionist [sic] violence or die for the gain of ruling class," states one flyer, a copy of which was obtained by *The College Fix*.

"It does not matter if it is a mosque, a church, a synagogue, a cultural or religious organization of any description – materially supporting Zionism, occupation, and genocide is not something the masses of people are willing to tolerate any longer," it adds.

"Having an organization in our city that invites active combatants from an army engaged in a genocide to propagandize to the students and the masses, as Hillel has done several times since October 7th of 2023, is not something people are willing to accept."

Advertisements for the demonstration had already caused anger among many observers earlier in the week.

“[C]alling for Hillel’s removal from the @uoregon is an abhorrent intimidation tactic that threatens public safety. ADL calls on University officials to investigate,” ADL Pacific Northwest [stated](#) on X on Oct. 5.

The president of the Anti-Defamation League, Jonathan Greenblatt, also called out the protest, arguing it is not free speech but rather “targeted harassment.” He [called on](#) campus officials to “take action.”
